► PROFILE

Software Engineering Graduate with a strong foundation in industrial environments. Dedicated to identifying operational challenges and implementing practical solutions that drive efficiency. A disciplined professional focused on continuous learning and contributing effectively to cross-functional teams.

► TECHNICAL SKILLS

- Java
- Spring Boot
- Python
- React
- NextJs
- MySQL
- Machine Learning
- JavaScript / TypeScript
- HTML/CSS
- GIT
- Docker
- Azure

► ESSENTIAL SKILLS

- Adaptability
- Communication
- Problem-Solving & Critical Thinking
- Teamwork & Collaboration
- Time Management

► WORK EXPERIENCE

National Development Bank PLC

Undergraduate Intern - Software Engineering (August 2023 – August 2024)

- Developed a web application with middleware functionality using **Spring Boot**, **MySQL**, and **Java** for the eRemittance transaction system, enabling efficient monitoring and resolution of ambiguous transactions for the Remittances department.
- Built a repository analytics dashboard with **Spring Boot** and **JavaScript** to track GitLab repository activities, providing real-time insights and optimizing the development workflow.
- Collaborated with development teams, contributed technical documentation, and adapted quickly to new technologies and project requirements.

DFCC Bank PLC

Trainee – Personal Financial Services Dept. (February 2021 – June 2021)

- Processed new credit card applications in the Personal Financial Services department, ensuring accuracy and timely handling of customer data while maintaining compliance with banking procedures.

► EDUCATION

BEng (Hons) Software Engineering

Second Class Lower Division

University of Westminster (UK), IIT Sri Lanka (January 2022 – September 2025)

- Completed a four-year Bachelor of Engineering in Software Engineering, including a year-long industrial internship.
- Developed strong knowledge of software engineering principles, modern development practices, and multiple programming languages.
- Completed two major research and development projects, demonstrating problem-solving and analytical skills.
- Relevant Coursework: Object Oriented Programming, Database Systems, Server-Side Web Development, Machine Learning and Data Mining, Algorithms & Data Structures, Concurrent Programming, Operational Research and Optimization.

GCE Advanced Level – Physical Science Stream

Royal College, Colombo 07 (July 2017 – August 2019)

- Physics – C
- Chemistry – C
- Combined Mathematics – S
- General English – A

► VOLUNTEER WORK

- Member of IEEE Computer Society Student Branch Chapter of IIT (2022 – 2025)
- Member of Leo Club of IIT (2022 – 2025)
- Volunteer teacher at Vajira Buddhi Dhamma School, Depanama, Pannipitiya. (2022 – Present)
- IIT Cutting Edge 2022 – Secretarial Committee Volunteer
- IIT Cutting Edge 2025 – Volunteer

► HOBBIES

- Chess
- Geography
- Hiking
- History
- Video Games

► PROJECTS

SpendSense – Final Year Research Project

[Repository](#)

AI-Powered Personal Financial Advisor

- Developed a financial platform using **Flask** and **React**, integrating **XGBoost** (expense prediction), **Isolation Forest** (anomaly detection), and **Prophet** (stock forecasting) to deliver personalized insights. Implemented an **NLP-driven** chatbot and interactive dashboard to visualize spending habits and automate budget planning based on user financial goals.

ChatLink

[Demo](#) [Repository](#)

Real-Time Web Chat Application

- Built a secure, real-time chat application using **Java Spring Boot**, **WebSockets**, and **MySQL**, featuring instant message synchronization and file attachment support.
- Containerized the full-stack solution with **Docker** and deployed on **Azure**, utilizing transactional email services (SMTP) for account verification and notifications.

MemoryServe

[Demo](#) [Repository](#)

RAG-Powered Knowledge Base

- Built a secure personal knowledge application using **Retrieval-Augmented Generation (RAG)**, allowing users to store, index, and semantically search through PDF documents and manual notes.
- Implemented a vector storage system using **MongoDB Atlas** Vector Search and **Google Gemini** embeddings, allowing the AI to retrieve precise context from stored data to answer complex queries with high accuracy.
- Created a responsive user interface with **Next.js** and **TypeScript**, including features like real-time message streaming and secure login via **Clerk**.

Sinhala OCR & Document Converter

[Demo](#) [Repository](#)

AI-Powered Sinhala OCR Solution

- Engineered a specialized OCR tool converting scanned Sinhala documents to editable Word files using **FastAPI (Python)** and **Next.js**, optimizing **Tesseract** with including smart upscaling and contrast enhancement.
- Deployed a microservices architecture with the backend Dockerized on **Hugging Face Spaces** and the frontend hosted on **Vercel**.

► CERTIFICATIONS / COURSES

- Microsoft Certified: Azure Data Fundamentals – Microsoft
- Microsoft Certified: Azure AI Fundamentals – Microsoft
- Agile Project Management with Jira Cloud: 1 Projects, Boards, and Issues – LinkedIn Learning
- Agile Project Management with Jira Cloud: 2 Lean and Agile Processes – LinkedIn Learning
- Artificial Intelligence Foundations: Machine Learning – LinkedIn Learning
- Pearson assured diplomas in IT and English – ESOF Metro Campus (2021)
